Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at http://about.jstor.org/participate-jstor/individuals/early-journal-content.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PROCEEDINGS

OF THE

AMERICAN ACADEMY

OF

ARTS AND SCIENCES.

NEW SERIES.
VOL. II.

WHOLE SERIES.
VOL. X.

FROM MAY, 1874, TO MAY, 1875.

SELECTED FROM THE RECORDS.

BOSTON:
PRESS OF JOHN WILSON AND SON.
1875.

CONTENTS.

PAGE

I. *Researches on the Hexatomic Compounds of Cobalt.* By Wolcott Gibbs, M.D. 1

II. Contributions to the Botany of North America. By Asa Gray:—
1. *Synopsis of North American Thistles* 39
2. *Notes on Borraginaceæ* 48
3. *Synopsis of North American Species of Physalis* . 62
4. *Characters of various New Species* 68

III. *Graphical Integration.* By Edward C. Pickering . . 79

IV. *On the Solar Motion in Space.* By Truman Henry Safford 82

V. *Historical Sketch of the Generic Names proposed for Butterflies: A Contribution to Systematic Nomenclature.* By Samuel H. Scudder 91

VI. *On the Wide Diffusion of Vanadium and its Association with Phosphorus in many Rocks.* By A. A. Hayes, M.D. . 294

VII. Contributions from the Physical Laboratory of the Massachusetts Institute of Technology:—
1. *Foci of Lenses placed Obliquely.* By Prof. E. C. Pickering and Dr. Chas. H. Williams . . 300

VIII. Brief Contributions from the Physical Laboratory of Harvard College:—
1. *On the Effect of Heat upon the Magnetic Susceptibility of Soft Iron.* By H. Amory and F. Minot 308

IX. *A Conspectus of the North American Hydrophyllaceæ.* By Asa Gray 312

X. *Revision of the Genus Ceanothus, and Descriptions of New Plants, with a Synopsis of the Western Species of Silene.* By Sereno Watson 333

XI. *List of the Marine Algæ of the United States, with Notes of New and Imperfectly Known Species.* By W. G. Farlow 351

XII. Brief Contributions from the Physical Laboratory of Harvard College: —
2. *On a New Induction Coil.* By John Trowbridge 381
3. *On the Effect of Armatures on the Magnetic State of Electro-Magnets.* By B. O. Peirce and E. B. Lefavour 385
4. *On the Time of Demagnetization of Soft Iron.* By W. C. Hodgkins and J. H. Jennings . . . 387

XIII. Contributions from the Physical Laboratory of the Massachusetts Institute of Technology: —
2. *Light transmitted by one or more Plates of Glass.* By W. W. Jacques 389

XIV. *On the Application of Logical Analysis to Multiple Algebra.* By C. S. Peirce 392

XV. *On the Uses and Transformations of Linear Algebra.* By Benjamin Peirce 395

XVI. Optical Notices. By Wolcott Gibbs, M.D.: —
1. *On a New Optical Constant* 401
2. *On a Method of Measuring Refractive Indices without the Use of Divided Instruments* 417

XVII. Contributions from the Physical Laboratory of the Massachusetts Institute of Technology: —
3. *Intensity of Twilight.* By Charles H. Williams 421
4. *Light of the Sky.* By W. O. Crosby 425
5. *Light absorbed by the Atmosphere of the Sun.* By E. C. Pickering and D. P. Strange . . . 428
6. *Tests of a Magneto-Electric Machine.* By E. C. Pickering and D. P. Strange 432
7. *Answer to M. Jamin's Objections to Ampère's Theory.* By William W. Jacques 445

XVIII. *Melanosiderite: A New Mineral Species, from Mineral Hill, Delaware County, Pennsylvania.* By Josiah P. Cooke, Jr. 451

XIX. *On Two New Varieties of Vermiculites, with a Revision of the other Members of this Group.* By Josiah P. Cooke, Jr., and F. A. Gooch 453

Proceedings 463
